

# Short Profile

**Company Name:**

TANZANIA BRUSH PRODUCTS LTD

**Company Logo**

**Who we are**

We are a medium-scale company with 160 employees in Dar es Salaam that specializes in manufacturing household products, paint brushes, industrial brushes, and related articles from thermoplastic polymers.

**What we do**

We deal in injection molding thermoplastic products made of HDPE, PP, CP, PET, and PVC. Normally, we introduce new items of international quality and standards that meet the needs of our clients at a reasonable price. The household products sector and building industry are our two primary industries. Tanzania, Malawi, Zambia, the Democratic Republic of Congo, Burundi, and Rwanda constitute the majority of our customers.

**What we offer**

We have spoken brushes for more than 50 years. That enabled us to gain a thorough understanding of the East African market, particularly Tanzania, which would aid us in capturing the home market with a high-quality products. Furthermore, we are Tanzania's leading manufacturer, producer, and supplier of locally manufactured quality brooms, brushes, specialty industrial brushes, and associated goods.

## What we need

The majority of our production machines are current generation high performance CNC operated from the world renowned machines suppliers, mainly from Germany since our commencement in 1968. Despite the fact that we are at the forefront of deploying modern technological machinery and equipment, we still facing the challenge of a limited number of modern technological machinery with high capacity and the ability to manufacture enough to meet current demand. As a result, we're looking for a financial source at favorable terms and conditions for financing the acquisition of new machinery.

## Our Equipment

We have 6 injection moulding machines, 7 filling machines, 3 flagging machines, 5 plastic recycling crusher machines, 2 plastic blow machines, 5 compressors, 2 sewing machines, 5 industrial chillers, 3 shrinking machines, 3 generators, 1 galvanized wire rewinding machine and 3 trimming machines.
