

Großwerkzeuge aus europäischer Sicht

für globale Märkte

INEVO
INSPIRING EVOLUTION

We are the bridge between today's manufacturing
and tomorrow's mobility.

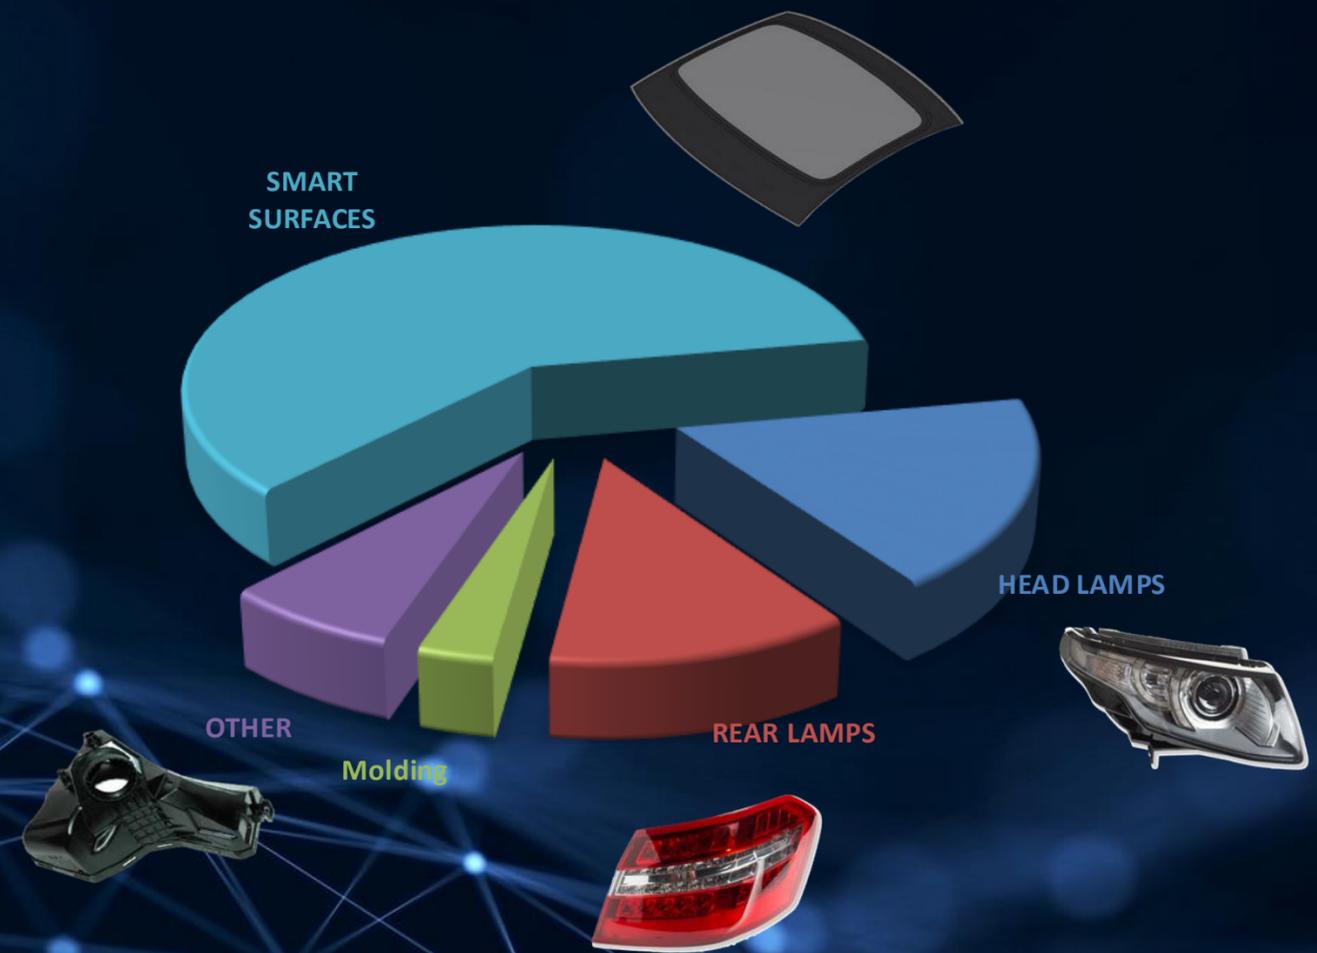

Facts about INEVO

INEVO GROUP

FACTS AND FIGURES

- 15 SE activities/year
- >100 injection tools/year
- 5.000.000 moulded parts/year
- European tooling & process integrator

Customers and global presence

Trends

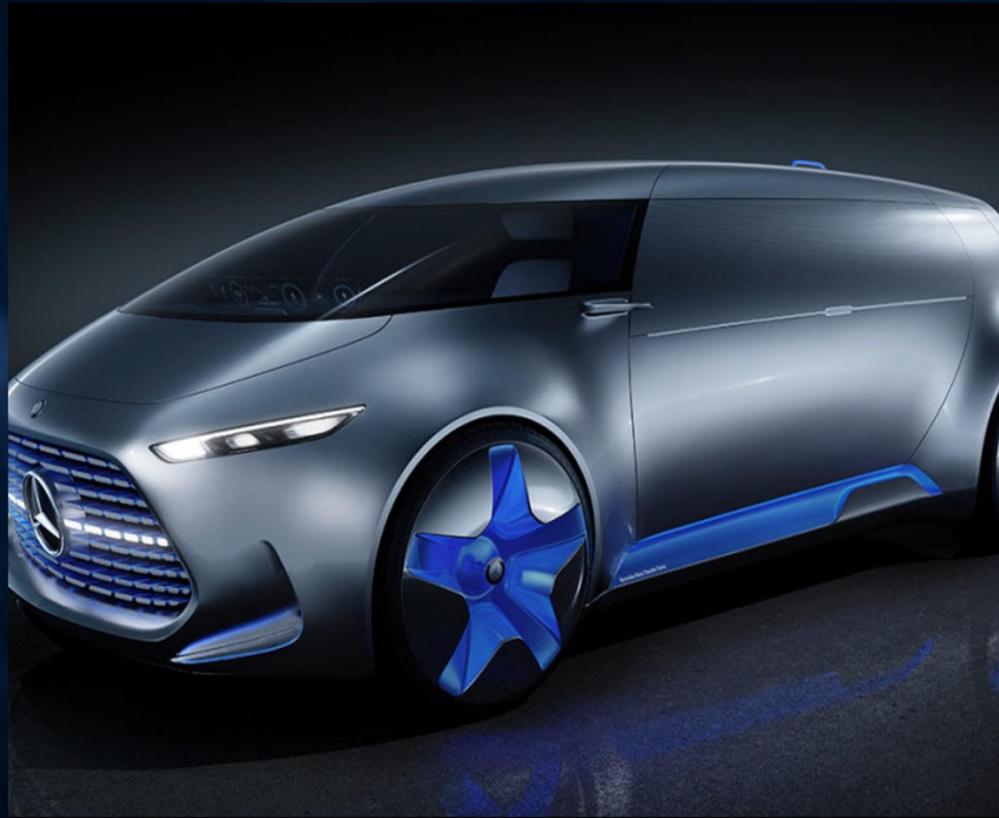

Market Pressure: Cost Meets Complexity

- Vehicles are becoming more expensive while affordability declines
- Electrification and ADAS increase complexity and variant pressure
- OEMs need to deliver more technology at lower cost and shorter lead times
- Industrialisation capability is the true differentiator

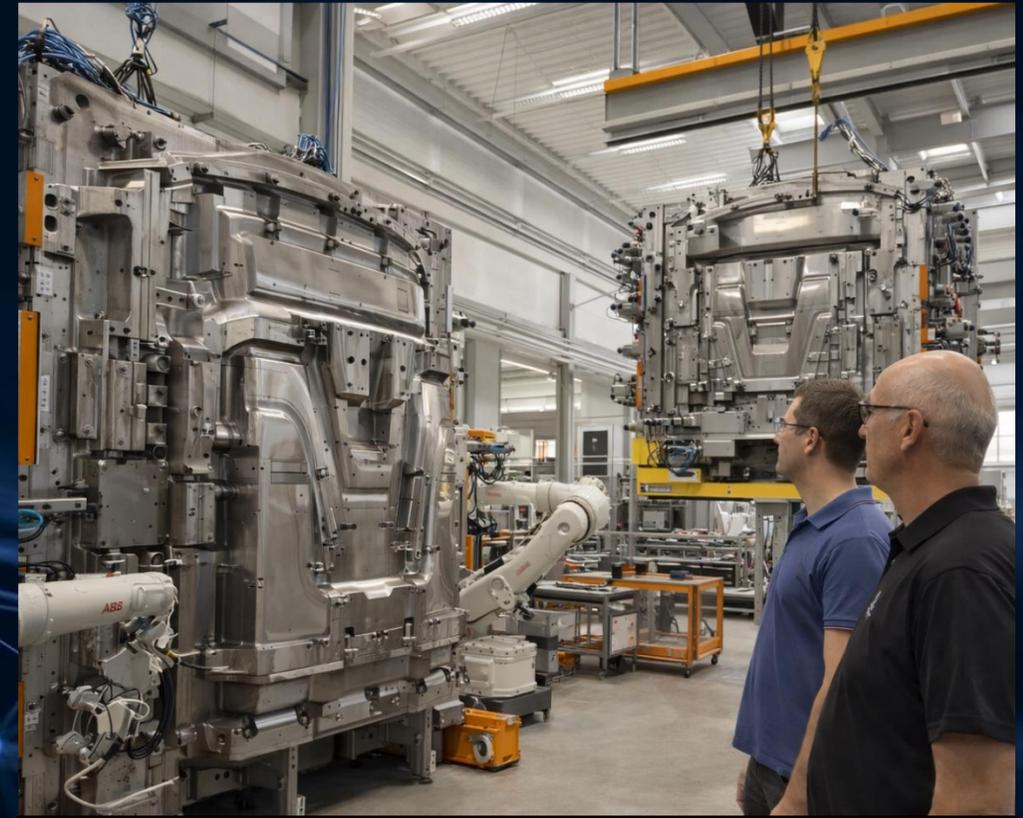

Large-Scale Parts: The New Normal

OEMs move towards less, but also larger exterior modules

Bumper and front-end systems become functional carriers

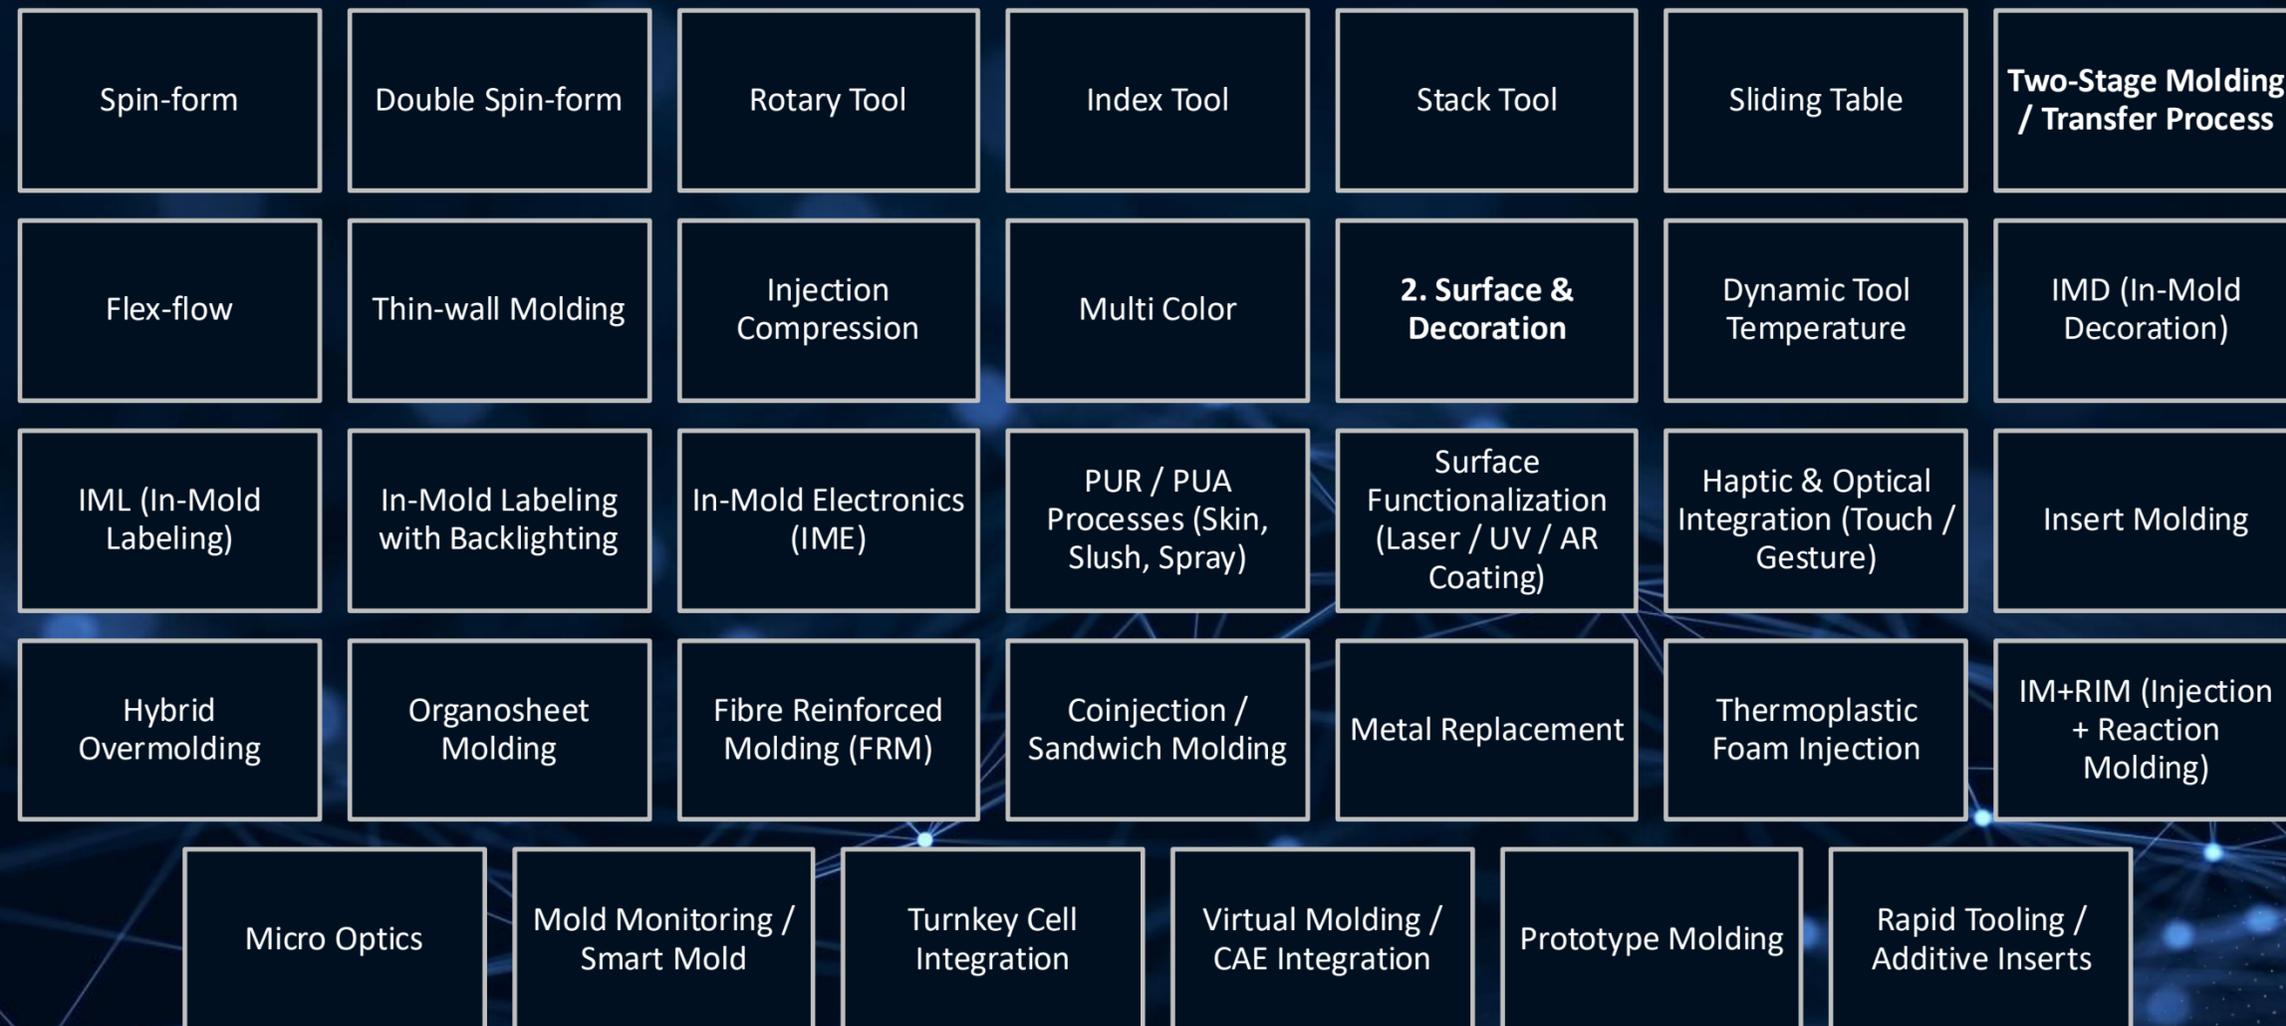

Tool size, handling and automation constraints grow significantly

Case Studies

Innovative Surface Technologies

Light is the New Chrome

- Decorative chrome is replaced by functional lighting signatures
- Driven by sustainability, cost and brand differentiation
- Optical integration requires tighter tolerances and cleaner processes
- Exterior becomes a functional interface

Headlense with PUR

2K + Hardcoat

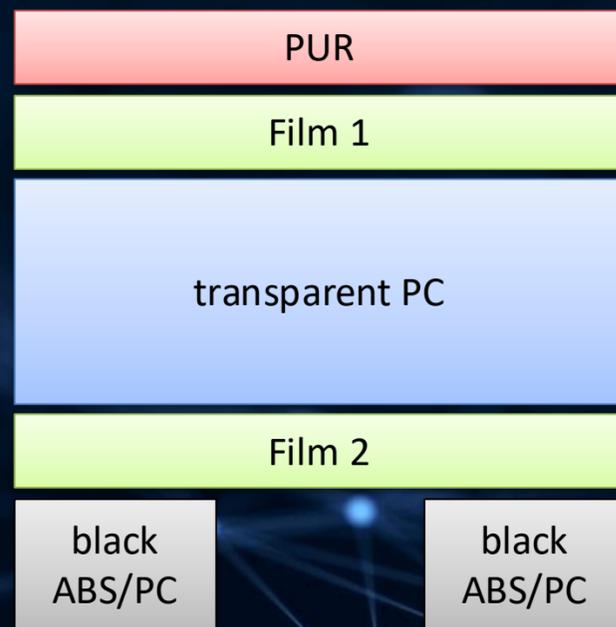

- Proven and stable industrial approach
- Separate coating process
- Lower tooling complexity

3K + PUR + Film

- Integrated protection, optics and functionality
- Reduced external process steps
- Enabler for large-scale headlamp concepts

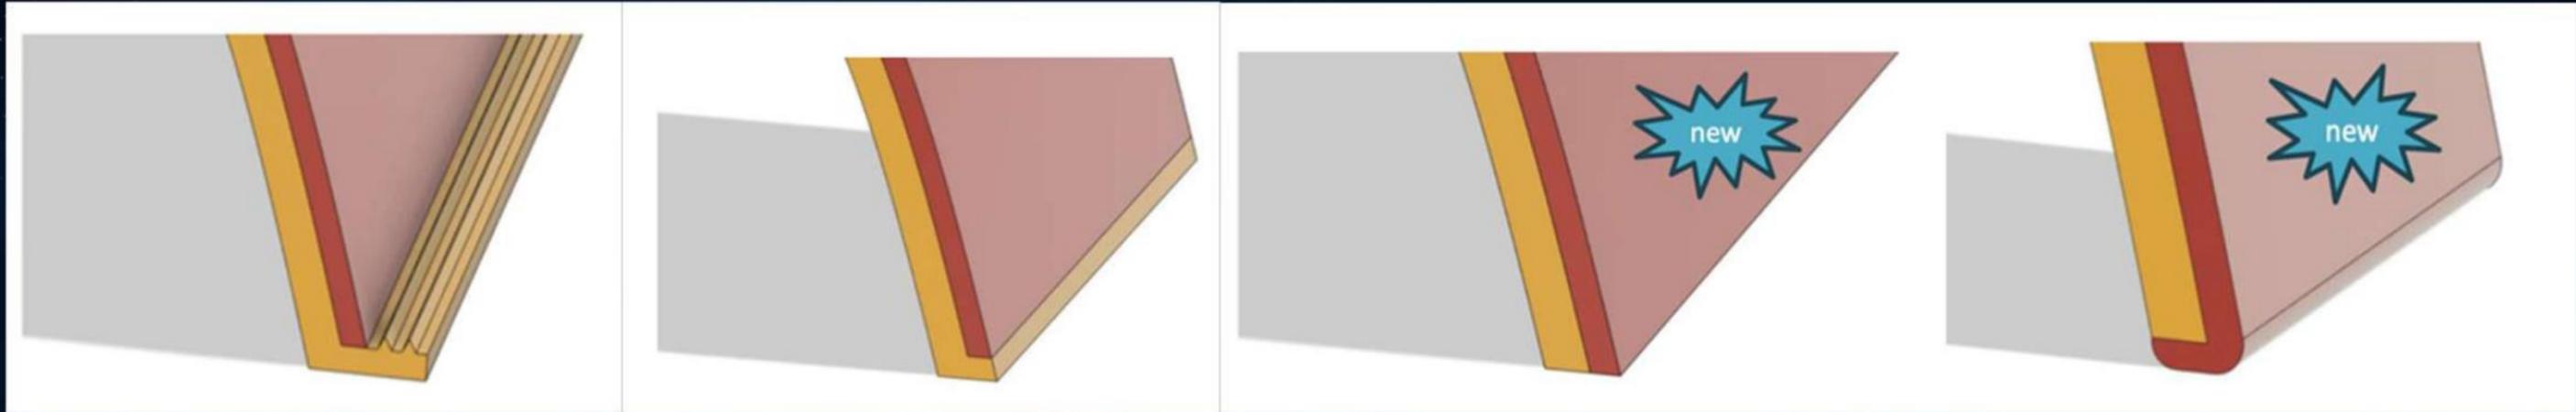

In Mold Labeling and In Mold Coating for lighting and backlit components

INEVO expertise for IMC

Sealing

- ✓ Undercuts
- ✓ Family moulds
- Draft angles
from 3° to 8° degrees

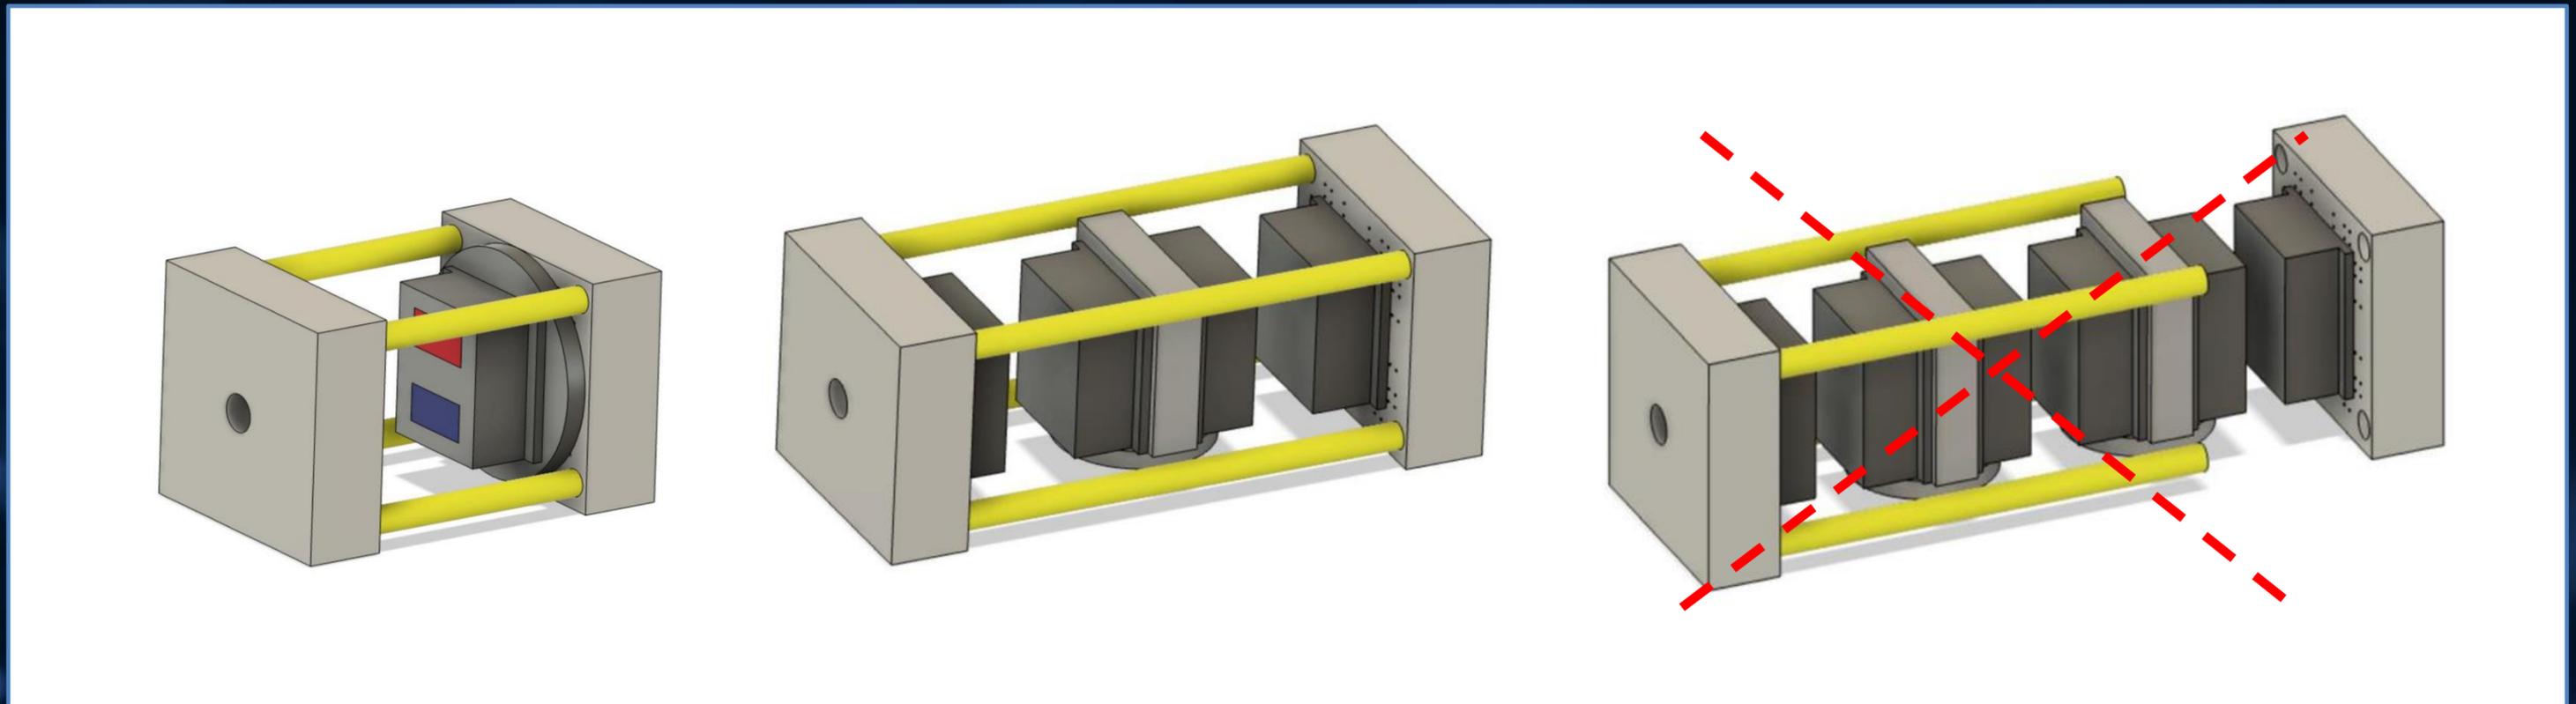

Holes

- ✓ Camera holes
- ✓ EV chargers
- ✓ Functional elements

Textures

- ✓ on inner layer
- ✓ on outer layer
- ✓ matt surfaces

The most common tool concepts

Rotary

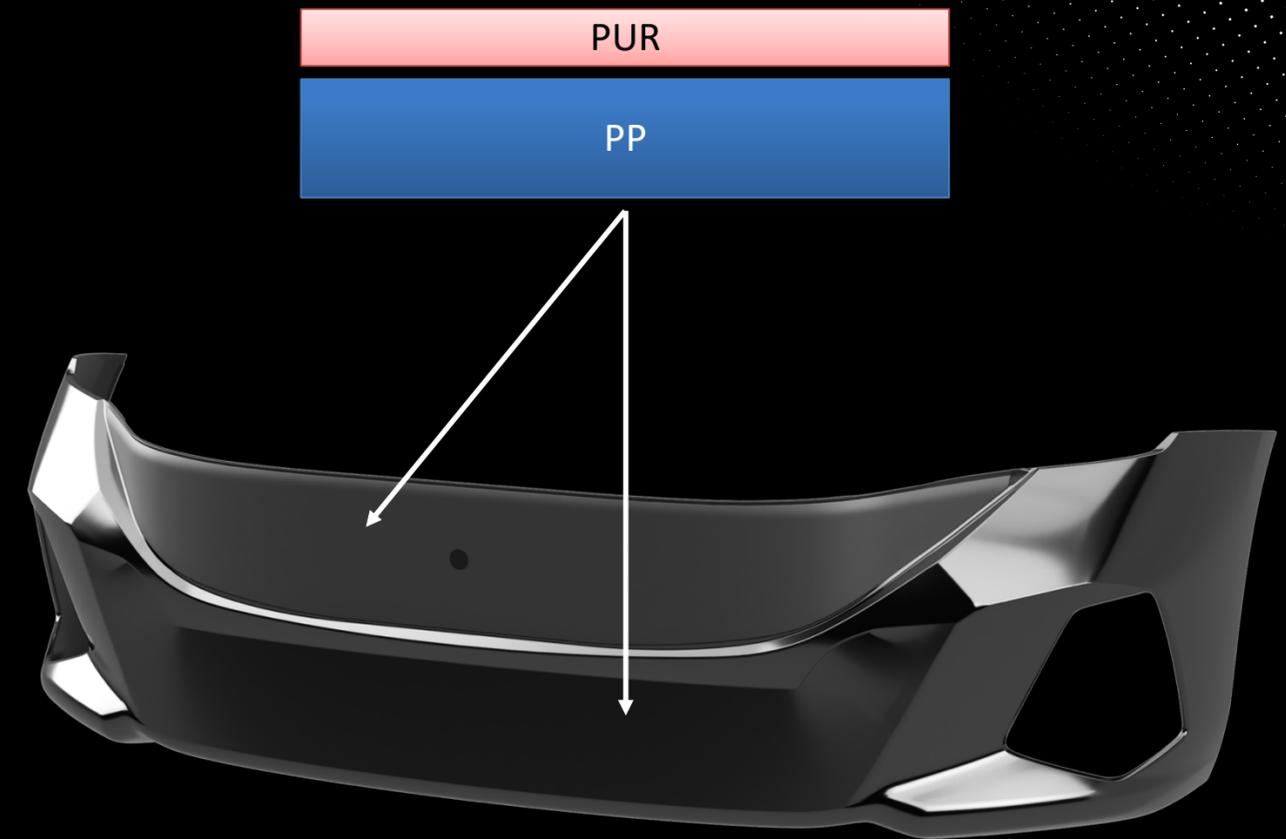

Spinform

Double Spinform

Fascia - PUR

From Design Vision to Industrial Reality

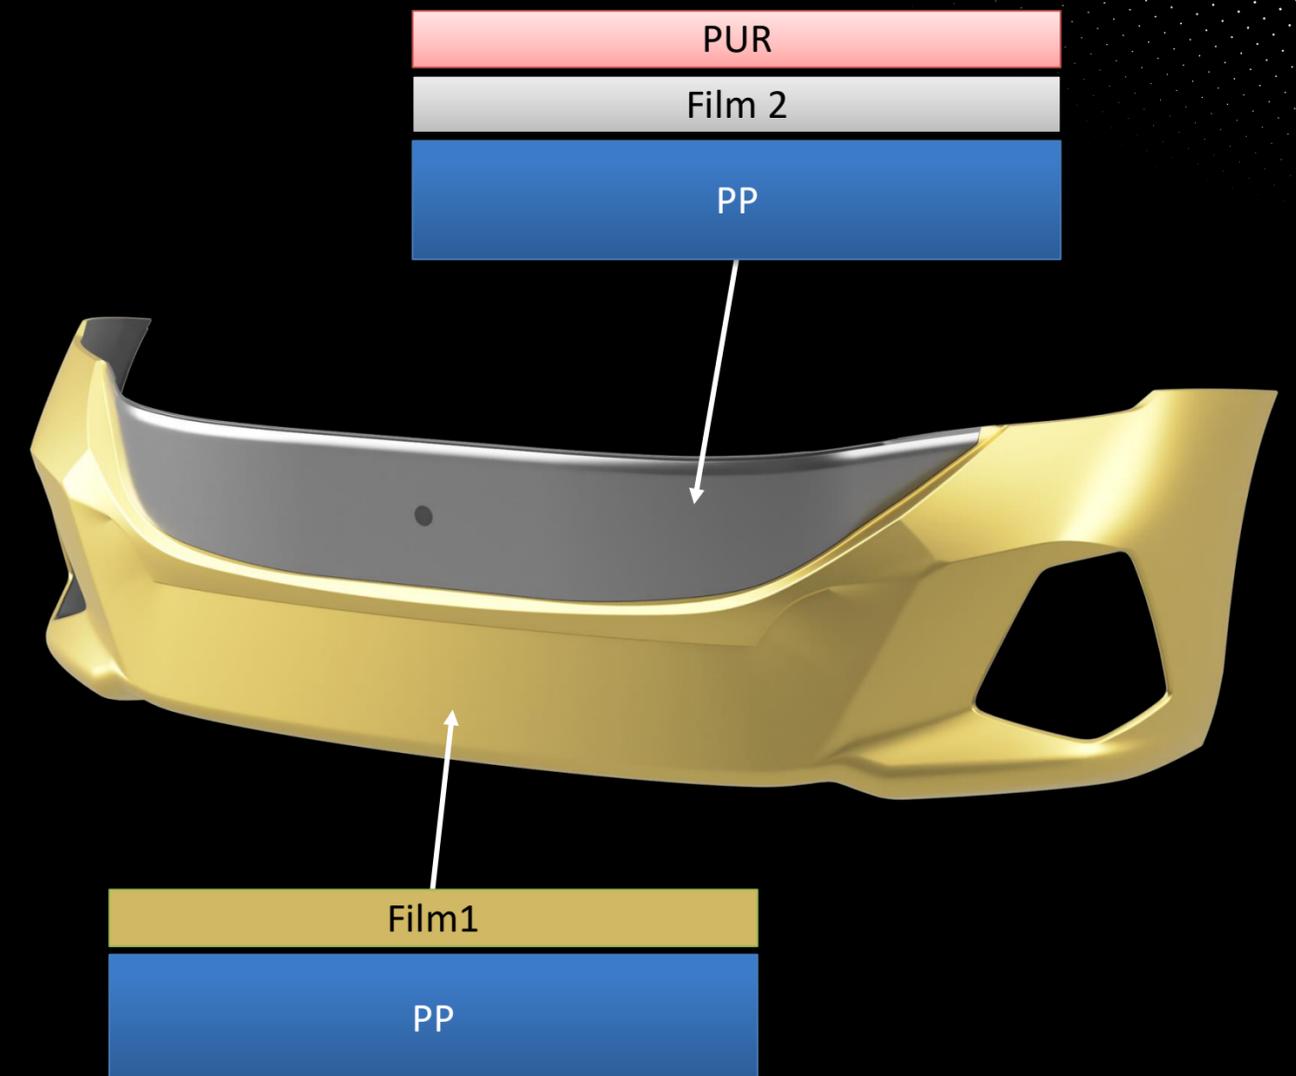

- Frontend parts are becoming larger, more visible and functionally integrated
- Film defines color and surface – no paint shop required
- Short cycle times even for large-scale exterior components
- Industrialization is the real challenge

Fascia "All in one"

From Design Vision to Industrial Reality

- Frontend parts are becoming larger, more visible and functionally integrated
- Film defines color and surface – no paint shop required
- Short cycle times even for large-scale exterior components
- Industrialization is the real challenge
